AZLON® CUSTOM PRINTED WASH BOTTLES

Design your own wash bottle and we will print it for you.

Available in a range of bottle sizes from 250ml – 1000ml, wide or narrow mouth, venting or non-venting with a choice of cap colours. Call today for details or contact us for a quote. Minimum order usually 500.

TECHNICAL INFORMATION – WASH BOTTLES

Azlon® Multilingual wash bottles are available in a number of language combinations and possess information on solvent identity and Globally Harmonised System hazard and safety information. The Azlon® Multilingual OSHA (Occupational Safety and Health Administration) range also displays pictograms indicating appropriate Personal Protective Equipment (PPE) for use. Azlon® wash bottles are available in a variety of designs and sizes for general and specific applications either non-vented or vented to prevent solvent loss.

KEY TERMS

Chemical resistance of the polymers

Good resistance to a range of laboratory chemicals including acids, bases and some solvents.

Autoclaving

Products that are autoclavable are identified by an autoclave symbol in this catalogue.

AZLON® MULTILINGUAL WASH BOTTLE RANGE

The Azlon® Multilingual Wash Bottle range displays chemical information in multiple European languages and also meets the latest requirements in European safety legislation – plus all of the regular features and benefits of this popular laboratory essential.

Chemical names with an option of 10 languages eliminate the need for multiple wash bottles across European language speaking countries.

Chemical formulae and CAS number for easy identification of solvent contained.

Globally Harmonised System reflects the latest changes in European legislation including new pictograms.

Signal word (i.e. 'Danger'), to identify the severity of the hazard statements, replace the old risk phrases.

KEY FEATURES & BENEFITS

- Wide mouth for easy filling
- Colour-coded for ease of identification
- Precision jet tip for fine control
- Choice of indelibly printed solvent labels
- Option of vapour venting to eliminate hazardous drips

Wide mouth for easy filling and colour-coded cap and bottle for easy recognition of solvent.

Precision jet tip for fine control.

Available with Driplok® vapour venting technology featuring a unique, patented two-way valve.

Safety information in multiple languages.

SOLVING THE SOLVENT PROBLEM

Volatile solvents can create a build-up of gas, forcing solvent up and out of the spout. This causes a steady drip of highly dangerous, flammable liquid.

The Driplok® venting wash bottle has a unique, patented two-way valve. It allows the vapour to escape when pressure builds up and stops air getting into the liquid.

THE RESULT

No more hazardous drips or dribbles and an accurate, continuous dispensing stream.

AZLON® ROUND INTEGRAL WASH BOTTLE

With the design of the Azlon® Round Integral Wash Bottle, you can be sure to dispense liquids in a safe and efficient manner with extra protection from contamination.

As with other wash bottles in the Azlon® range the Round Integral Wash Bottle displays chemical names and key safety information in four European languages and meets the latest requirements in European safety legislation – plus all of the regular features and benefits of this popular laboratory essential.

Traditional wash bottles consist of several components – a bottle, a cap and an inner tube. The inner tube can be a source of contamination when refilling as it is typically placed on a lab bench surface. To address this, the Azlon® Round Integral Wash Bottle has an integral inner straw that eliminates the need to place the inner tube down when refilling, minimising the risk of contamination.

Chemical names in English, French, German and Spanish eliminate the need for multiple wash bottles across European language speaking countries.

Chemical formulae and CAS number for easy identification of solvent contained.

Signal word (i.e. 'Danger'), to identify the severity of the hazard statements.

Globally Harmonised Symbols reflects the latest changes in European legislation including new pictograms.
