# The New MA160 Moisture Analyzer Your Manager for Complex Applications

# Makes Your Moisture Analysis Easy and Convenient

The new MA160 is designed with you and your QC lab staff in mind who need fast, highly repeatable moisture results, management of several methods for different products and transfer of methods between instruments. The MA160 ensures easy method development and management, as well as simple sample handling and instrument performance testing.

Its ergonomic BetterClean design takes the effort out of cleaning and its status light conveniently indicates the progress of each analysis step.

## Assistant Function for New Methods

The Method Assistant function enables you to easily develop new methods. Three simple steps are all it takes to develop a new method in less than 45 minutes.

## High Storage Capacity

You can load or save up to 100 methods. Quickly develop your library by exchanging method files or downloading them from an application database.

## Time-saving

The ergonomic design with an integrated pan draft shield and sample tongs make it easy to handle samples, saving you time and effort.

## Easy-to-run Performance Testing

The menu includes a function for running an instrument performance test that you will find easy to use along with the ReproEasy Pad feature for complete reproducibility.

## Convenient Progress Tracking

The MA160 status light indicates the progress of an analysis run so you can conveniently check the remaining time, even from a distance of 10 m or 33 ft.

## Effortless Cleaning

The heating module and the sample chamber plate can be removed and cleaned in a dishwasher – this BetterClean design ensures easy, thorough cleaning of the instrument parts.
