Soil analysis made easy

Monitoring and reliable analysis are corner stones in supporting and maintaining healthy, productive and biologically active soil. To effectively and efficiently plan all measures that affect the soil (fertilization, liming, etc.) it is crucial to determine the important soil parameters (nitrate, phosphate, potassium and ammonium). The PF-3 Soil in combination with the proven VISOCOLOR® ECO and NANOCOLOR® tests is ideally suited for mobile analysis of the soil quality right at the point of interest
